Many things have changed since Ingrassia Construction Company's founding in 1928, but one thing has not: Its commitment to offering quality construction at competitive prices.

Ingrassia Construction Co. Inc. is currently a full service general construction company working with industrial, commercial and institutional clients. Providing services ranging from original concept development through site preparation, structural integrity and practical finishing elements, the company offers excellence in workmanship combined with a foundation of integrity.

Anthony W. Ingrassia, current president, represents the third generation of Ingrassia Construction. His grandfather, an architect student and carpenter tradesman, started the business with a focus on industrial and commercial cli-

ents. His personal vision established a construction company that provided exceptional value for retail and manufacturing clients in northern New Jersey.

In the late 1950s, Anthony's father took the helm and directed the company toward public institutional construction. Ingrassia Construction expanded its scope to include schools, hospitals and various government facilities without losing sight of its original mission to offer quality construction at competitive prices.

Anthony started with the business in 1996, after having received a Bachelor of Science degree in Building Construction from the University of Florida. Taking over as president in 2006, Anthony has facilitated continued, quality work within the public sector while pressing the company toward significantly expanding into the private

sector. With a winning combination of state-of-the-art technology, a network of strategic partnerships, and expertise in diverse construction capabilities, Ingrassia Construction has enjoyed steady growth.

"Our goal has always been to deliver efficient, cost-effective

Many things have changed since **Ingrassia Construction Company's** founding in 1928, but one thing has not...

and high quality construction," says Ingrassia. "We accomplish this through empowering our team, by constantly seeking to improve our knowledge base and experience, and by expanding our thinking and resources as the world economy, community and technology evolve."

The company was recently honored with a Family Business of the Year Award from NJ Monthly maga-

zine. Among its notable, recent projects is the Union County Academy for Performing Arts school building, built on the Union County Vocational Technical Schools Campus in Scotch Plains. Completed in 2010, the \$12 million project showcases its expertise in a wide variety of ma-

terials and modern architectural features, including specialty metal panels, vertical channel glazing and sophisticated masonry capabilities.

"This project demonstrates our long tradition of providing a very high level of quality at a very competitive price," says Ingrassia. "We invite people to take advantage of our talent, our expertise, and our ability to create unsurpassed customer satisfaction."
